

## Information

### Covid-19 Test Options on MySwitzerland.com

Dear colleagues

Due to the increasing importance of Covid-19 PCR tests in order to make international travel possible again, the management has decided to display a selection of Covid-19 test options on MySwitzerland.com.

Here you can find some background information on the three different offers available on MySwitzerland.com (as of 22 February):

#### 1) Hirslanden Private Hospital Group

Hirslanden is the largest private hospital group in Switzerland (and one of our partners in the health campaign). They are providing Covid-19 tests (PCR and antigen) at several of their hospitals throughout Switzerland. The test can be booked online through a link on our website or on the Hirslanden website.

The costs have to be paid directly on the spot, costs vary from CHF 140 to CHF 160.

The test result will be available within 24 hours (antigen within 15 minutes). Tests are available in German, French or English.

<https://www.hirslanden.ch/en/corporate/campaign/corona-virus.html>

#### 2) Checkport Test Center at Zurich Airport

Checkport offers express PCR tests at Zurich Airport on a walk-in basis. The result will be available within 5 hours. Costs are CHF 195.00.

Please check separate memo for more information.

#### 3) Genolier Patient Services @home testing

Genolier Patient Services is the international entity of our other large health-partner, the Swiss Medical Network.

Genolier offers a type of VIP service where the Covid-19 test will be done at the accommodation of the guest (hotel / chalet etc.).

Tests can be done 7/7 and results will be available within 24hours. Costs start from CHF 400 (staff of laboratory comes to the home) and go up to CHF 1200 (doctor and nurse from a Genolier clinic come to the home).

This test is also possible for small groups staying at a hotel or rental home.

Of course, there are several other options for international guests to get tested in Switzerland. Testing facilities are also available at medical practices, various hospitals and pharmacies.

Some of these facilities can be booked through a Swiss online platform called [www.onedoc.ch](http://www.onedoc.ch). If you have interest from business partners for a test at a location not covered by one of the three above options, OneDoc might be a good option to book a test online (also available in English).

Please get in touch with me if you have any request from your business partners or any feedback. I'm happy to help so that we can facilitate trips of international guests to Switzerland during these difficult times.

Best regards

Switzerland Tourism
